Pre-Final Inspection Checklist

Date ___/___/___ Time __________
Address_______________________
Inspected by ___________________

Instructions: Check each of the following items prior to inspection. It is not possible to know exactly what the inspector will check. The most important objective is to ensure that the home is safe, for occupancy and that all systems are operating correctly. This checklist will help accomplish that objective.

Electrical

1. All lights
2. All outlets
3. All GFCI’s, INCLUDING those in garage, basement, exterior
4. Exhaust fans
5. Ceiling fans, attic fans
6. Breaker panel is properly labeled
7. Electrical system is properly grounded

Notes: __________________________________________________________________
__________________________________________________________________

Plumbing

1. Each fixture has a shut off valve
2. Each fixture has water hooked up
3. Hot and cold water are on the correct side
4. Fixture drains properly.
5. Floor drains work correctly.
6. Water heater has overflow pipe installed according to code
7. Water heater is correctly strapped (seismic zones 3 & 4 only)

Notes: __________________________________________________________________
__________________________________________________________________

Handrails, guardrails, stair rails and stairs.

1. All rails are the correct height
2. Objects can’t pass through protective guardrails and stair rails.
3. Landings outside house meet minimum requirements
4. Stairs have correct rise, run and headroom with handrail present.
5. Stairway is correct width.
6. Exterior stair have broom or non-slip surface.

Notes: __________________________________________________________________
__________________________________________________________________

Smoke detectors

1. Smoke detectors installed per plans
2. Smoke detectors work properly.
